

## PROJECT BRIEF

# McCormick Run and Y&O Road Bat Mist-Net Survey

Two areas of previous mine land (totaling 330 acres) near West Point, Ohio were proposed for restoration including restoration of streams and waterways. For restoration crews to have the option to remove trees within the project areas during the time-of-year restrictions for endangered bat species compliance with the Endangered Species Act, BioSurvey Group was contracted to complete a presence / absence bat survey. A total of 42 net nights of effort was conducted, capturing 19 bats of two species. No threatened or endangered species were captured during the mist-net survey. BioSurvey Group completed the surveys safely and efficiently and submitted a detailed report to both U.S. Fish and Wildlife Service as well as Ohio Department of Natural Resources within the scheduled time frame and budget.

**Year: 2024**

**Dates: July 26 - Aug 09**

**Value: \$31K**
